

CLAW COVER® C13

Leader in Cut Protection, Comfort and Dexterity

APPLICATIONS

Food Processing
Food Manufacturing
Knife Hand Glove
Off Hand Glove
Direct Food Contact

COLORS

FEATURES

A first in food processing: The extreme protection of an ANSI level A7 cut resistant glove plus the ultimate in manual dexterity and wearer comfort. Introducing the Claw Cover® C13 glove. Using our proprietary high-performance fiber blend plus steel, we've packed the high level of cut protection required for food processing into a light weight, 13 gauge glove. And it's ambidextrous – switch hands to use it where it's needed most, on the knife hand or the off hand. Shown in gray, the C13 is also available in red, lime green and high viz orange for a quick spot check that workers are using the proper hand protection. Like all Claw Cover gloves, it's 21 CFR compliant and suitable for direct food contact. Abrasion resistant and durable, simply machine wash for long-term use. Color coded hem indicates size. Made in the USA.
