

CLAW COVER® Dual Defense™ Deboning Glove

Maximum Cut Protection Where It Counts

APPLICATIONS

Deboning Applications
Meat & Poultry Processing
Foodservice
Direct Food Contact

FEATURES

With ANSI A9 cut resistance in the Dual Defense™ zone, this is the glove to have on hand when the primary task is deboning meat or poultry. The new Claw Cover® Dual Defense™ Deboning Glove features a base glove with significant ANSI A6 cut protection. Plus we reinforced the areas of the hand at highest risk of cuts and slashes with an additional barrier of cut resistant knit. That's the Dual Defense™ zone, and it scores the maximum cut protection published: ANSI A9. Like all Claw Cover gloves, it's compliant with FDA 21 CFR 177.2800 and approved for direct food contact. Excellent laundry characteristics extend wear life. Made in the USA.

ATTRIBUTES

| | |
