

MATA38HA-OERTC

Maximum Glove Life with Minimum Lint

APPLICATIONS

Automotive
Metal Fabrication
Appliance Manufacturing
Glass Handling
Construction

FEATURES

A great choice for handling sharp parts, repeatedly. We designed MATA38HA-OERTC gloves with filament to reduce the lint factor and keep particulate off the material you're handling. In addition to ANSI A4 cut protection, these heavy weight gloves deliver excellent abrasion resistance for long wear life and great product value. The reinforced thumb crotch strengthens what's typically the first part of a glove to wear out. And Hide-Away™ technology disguises dirt and soiling through repeated laundering cycles.

ATTRIBUTES
